Dear Hiring Manager,

I am writing to apply for the Software Developer Intern position. I am currently pursuing a Bachelor of Technology in Computer Science Engineering from K.R. Mangalam University and am in my second year.

I have a strong foundation in programming languages such as Python, Java, and JavaScript, along with hands-on experience in web development. I have developed projects including a full-stack blog platform, a quiz web application, and a contact management system. These projects have helped me build practical skills in problem-solving, backend logic, and database management.

I am highly motivated to learn and grow in a professional environment. I am particularly interested in gaining real-world experience, contributing to meaningful projects, and continuously improving my technical and collaborative skills.

I would welcome the opportunity to contribute to your team and further discuss how my skills align with your requirements.

Thank you for your time and consideration.

Sincerely,
Piyush Mishra
